

# Design & Animation 9/10 – WLSS – Mr. Hauk

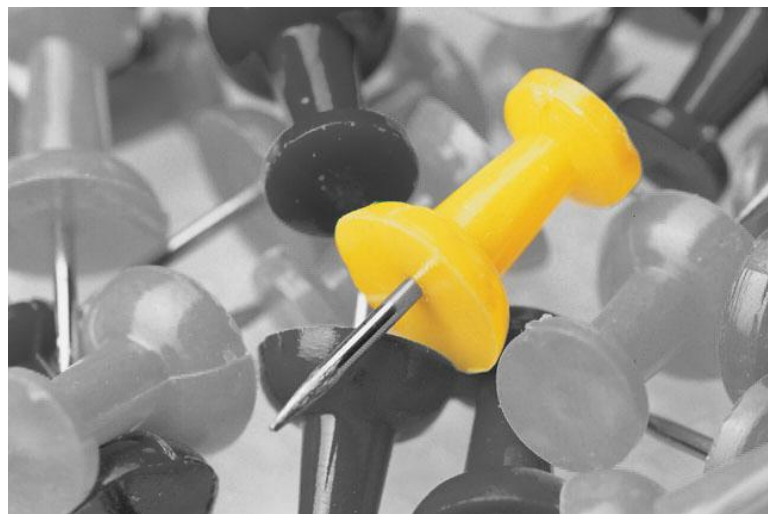

## Photoshop: Project 2 – Desaturation & Colouring

Name:

### Instructions:

Your task is to design a desaturation of an image (remove the colour) and retain the colour or artificially colour one area of the image. This coloured area should attract the viewers eye to that portion of the image (see examples below). Your image can be constructed with Internet graphics (try to find high resolution images whenever possible), stock art, and/or scanned images.

You will be marked according to the following criteria (10 marks):

Project 8 - Criteria	Max Score	Your Score
Composition shows no evidence of editing	2	
Images used are medium to high resolution, sharp, and clear	2	
Selection borders are precise	2	
Colour fill reveals background detail	2	
Demonstrates a high degree of creativity/originality	2	

### **Steps to Desaturate & Colour:**

1. Image Menu→Adjustments→Black & White
2. Select the area you would like to colour using one of the selection tools (ex. Quick Mask)
3. Go to Image→Adjustments→Hue/Saturation (Click Colorize box)\*
4. Adjust the Hue & Saturation

\*You may also paint in colour mode with the paintbrush in step 3 as an alternative
